CRITICAL SEVERITY 9.9 jQuery End of Life (EOL) Detection - Linux Target: GOT-ITS-Controller-1 IP: 10.0.98.3 Detected: 20 Mar 2026 Exposed for: 26 days 1. SUMMARY The jQuery version on the remote host has reached the end of life (EOL) and should not be used anymore. 2. IMPACT An EOL version of jQuery is not receiving any security updates from the vendor. Unfixed security vulnerabilities might be leveraged by an attacker to compromise the security of this host. 3. RECOMMENDED ACTION VENDORFIX Update jQuery on the remote host to a still supported version.	
CRITICAL SEVERITY 9.8 OpenBSD OpenSSH < 9.3p2 RCE Vulnerability Target: GOT-ITS-Switch-5548 IP: 10.10.30.1 Detected: 09 Apr 2026 Exposed for: 6 days CVE: CVE-2023-38408 1. SUMMARY OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent. 2. INSIGHT A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket. 3. AFFECTED SCOPE OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system. 4. RECOMMENDED ACTION VENDORFIX Update to version 9.3p2 or later.
