MANAGEMENT SUMMARY Key Critical Findings at a Glance Highlights the most critical vulnerabilities from the latest scan, including impact, scope, and recommended fixes. Remediate within 48 hours
CRITICALSEVERITY 9.9 jQuery End of Life (EOL) Detection - Linux Target: GOT-ITS-Controller-1 IP: 10.0.98.3 Detected: 20 Mar 2026 Exposed for: 47 days 1. SUMMARY The jQuery version on the remote host has reached the end of life (EOL) and should not be used anymore. 2. IMPACT An EOL version of jQuery is not receiving any security updates from the vendor. Unfixed security vulnerabilities might be leveraged by an attacker to compromise the security of this host. 3. RECOMMENDED ACTION VENDORFIX Update jQuery on the remote host to a still supported version.
CRITICALSEVERITY 9.8 OpenBSD OpenSSH < 9.3p2 RCE Vulnerability Target: GOT-Switch-Dell-5524 IP: 10.10.20.1 Detected: 23 Apr 2026 Exposed for: 13 days CVE: CVE-2023-38408 1. SUMMARY OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent. 2. INSIGHT A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket. 3. AFFECTED SCOPE OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system. 4. RECOMMENDED ACTION VENDORFIX Update to version 9.3p2 or later.

CRITICAL

SEVERITY 9.8

OpenSSH < 7.2 X11 Forwarding Security Bypass Vulnerability - Linux

🛡 Target: GOT-Switch-Dell-5524

🛡 IP: 10.10.20.1

🕒 Detected: 23 Apr 2026

🕒 Exposed for: 13 days

📄 CVE: CVE-2016-1908

📄 1. SUMMARY

OpenSSH is prone to a security bypass vulnerability.

🕒 2. INSIGHT

An access flaw was discovered in OpenSSH, it did not correctly handle failures to generate authentication cookies for untrusted X11 forwarding. A malicious or compromised remote X application could possibly use this flaw to establish a trusted connection to the local X server, even if only untrusted X11 forwarding was requested.

⚠ 3. IMPACT

Successfully exploiting this issue allows local users to bypass certain security restrictions and perform unauthorized actions. This may lead to further attacks.

🛡 4. AFFECTED SCOPE

OpenSSH versions before 7.2 on Linux.

🔧 5. RECOMMENDED ACTION

VENDORFIX

Update to version 7.2 or later.

Recommended actions

ข้อเสนอแนะเชิงปฏิบัติการสำหรับรอบถัดไป

- 1. IMMEDIATE**
Prioritize remediation for the highest-risk devices and close critical vulnerabilities first.
- 2. NEAR-TERM**
Review Medium and High findings in sequence and verify that affected systems are patched or mitigated.
- 3. CONTINUOUS**
Reassess risk trends monthly and compare future scan results against the current baseline.
