MANAGEMENT SUMMARY

## Key Critical Findings at a Glance

Highlights the most critical vulnerabilities from the latest scan, including impact, scope, and recommended fixes.

Remediate within 48 hours

CRITICAL SEVERITY 9.9

### jQuery End of Life (EOL) Detection - Linux

Target: GOT-ITS-Controller-1 IP: 10.0.98.3 Detected: 20 Mar 2026 Exposed for: 40 days

1. SUMMARY  
The jQuery version on the remote host has reached the end of life (EOL) and should not be used anymore.

2. IMPACT  
An EOL version of jQuery is not receiving any security updates from the vendor. Unfixed security vulnerabilities might be leveraged by an attacker to compromise the security of this host.

3. RECOMMENDED ACTION VENDORFIX  
Update jQuery on the remote host to a still supported version.

CRITICAL SEVERITY 9.8

### OpenBSD OpenSSH < 9.3p2 RCE Vulnerability

Target: GOT-Dell-3024-01 IP: 90.90.90.1 Detected: 22 Apr 2026 Exposed for: 7 days CVE: CVE-2023-38408

1. SUMMARY  
OpenBSD OpenSSH is prone to a remote code execution (RCE) vulnerability in OpenSSH's forwarded ssh-agent.

2. INSIGHT  
A condition where specific libraries loaded via ssh-agent(1)'s PKCS#11 support could be abused to achieve remote code execution via a forwarded agent socket.

3. AFFECTED SCOPE  
OpenBSD OpenSSH prior to version 9.3p2. The following conditions needs to be met: - Exploitation requires the presence of specific libraries on the victim system. - Remote exploitation requires that the agent was forwarded to an attacker-controlled system.

4. RECOMMENDED ACTION VENDORFIX  
Update to version 9.3p2 or later.

Recommended actions

ข้อเสนอแนะเชิงปฏิบัติการสำหรับรอบถัดไป

1. IMMEDIATE

Prioritize remediation for the highest-risk devices and close critical vulnerabilities first.

2. NEAR-TERM

Review Medium and High findings in sequence and verify that affected systems are patched or mitigated.

3. CONTINUOUS

Reassess risk trends monthly and compare future scan results against the current baseline.
